

SAGE™ CONTRACT - *Seating for higher learning*

Sage™ Contract

Sage Contract chairs combine understated design lines with a one-piece contoured shell on an elegantly curved steel frame.

Great for higher learning spaces, hospitality venues, reception areas, and open offices, Sage Contract complements a variety of interior environments.

A selection of options including arms, a wire bookrack, articulating tablet arm, and casters make Sage Contract a versatile seating and workstation choice from the commons area to the classroom.

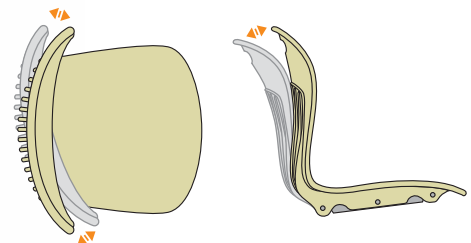

Bumpers attached to the legs allow four-high stacks of either padded or un-padded models. Molded plastic under-seat cover protects padded seats from pressure marks when stacked.

Sage chairs can be interchangeably stacked except models with bookracks or tablet arms.

Built-In Comfort

Passive ergonomics has been built into every seat within the Sage Contract line so the same comfort you get when it's new, will still be there years down the road. The integrated, multi-rib design allows gentle flexing in all directions.

Sage Contract was designed for Virco by the award-winning team of Peter Glass and Bob Mills and is manufactured in Torrance, California and Conway Arkansas.

Sage Contract Flexibility

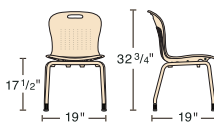

The Sage Contract Series includes several options, making this series an ideal choice in a variety of settings. Page 12 lists all the model variations that can be achieved using the options shown here.

Upholstered Seats - Add additional comfort and style by getting a Sage model with upholstery.

Plastic Seat - The foundation of all Sage models is the molded soft plastic seat. Its unique ribbed back gives the chair strength while allowing it to gently flex with the user's movement.

Bookrack - A bookrack can be added to any 4-leg Sage Contract model.

Arm Kit - These can be added to the soft plastic or upholstered models.

Casters - Casters can be added to any 4-leg Sage Contract model.

..... **Articulating Tablet Arm** - Virco's chair/desk combo unit incorporates an articulating tablet arm that allows easy seating access when raised and plenty of writing space when lowered.

Tablet Arm Flexibility

Ideally designed for standard and collaborative learning environments, the Sage Contract can be configured with an articulating tablet arm as well as casters and a bookrack to create a compact and versatile workstation.

Tablet Arm

Constructed of high-pressure laminate with a plywood core.

..... **Upholstered Seats** - An upholstered seat pad is available on all Sage Contract models. See last page for available colors.

..... **Wire Bookrack** - A welded-on wire bookrack provides ample storage for books, backpacks or personal belongings.

..... **Casters** - Get moving by adding casters to any Sage Contract model.

Sage Task and Lab Seating

The use of task or lab seating is a common preference in many classroom environments and the Sage Series has models that can be tailored to meet those needs.

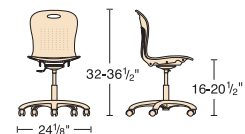

Adjustable-height Footring - Adjusts 8" - 14".

Armrest - These skinned polyurethane armrests add another level of comfort.

SGTASK18AP - Task chair with optional upholstered padded seat and armrests.

SGLABP - Lab stool with upholstered padded seat and adjustable footring.

SGLAB - Lab stool with adjustable footring.

SGTASK18 (shown) - Task chair.
SGTASK18A - Task chair with armrests.

SGTASK18P - Task chair with upholstered padded seat.

Glide Options

U2635CAST - Seats can be outfitted with twin-wheel soft casters for a quieter ride on solid surfaces.

UGLIDE - Putting the UGLIDE in place of casters is common in lab settings where lab-height seating is needed, but with the extra stability of a stationary stool.
